

Sum of Commission Earned by Year and Month

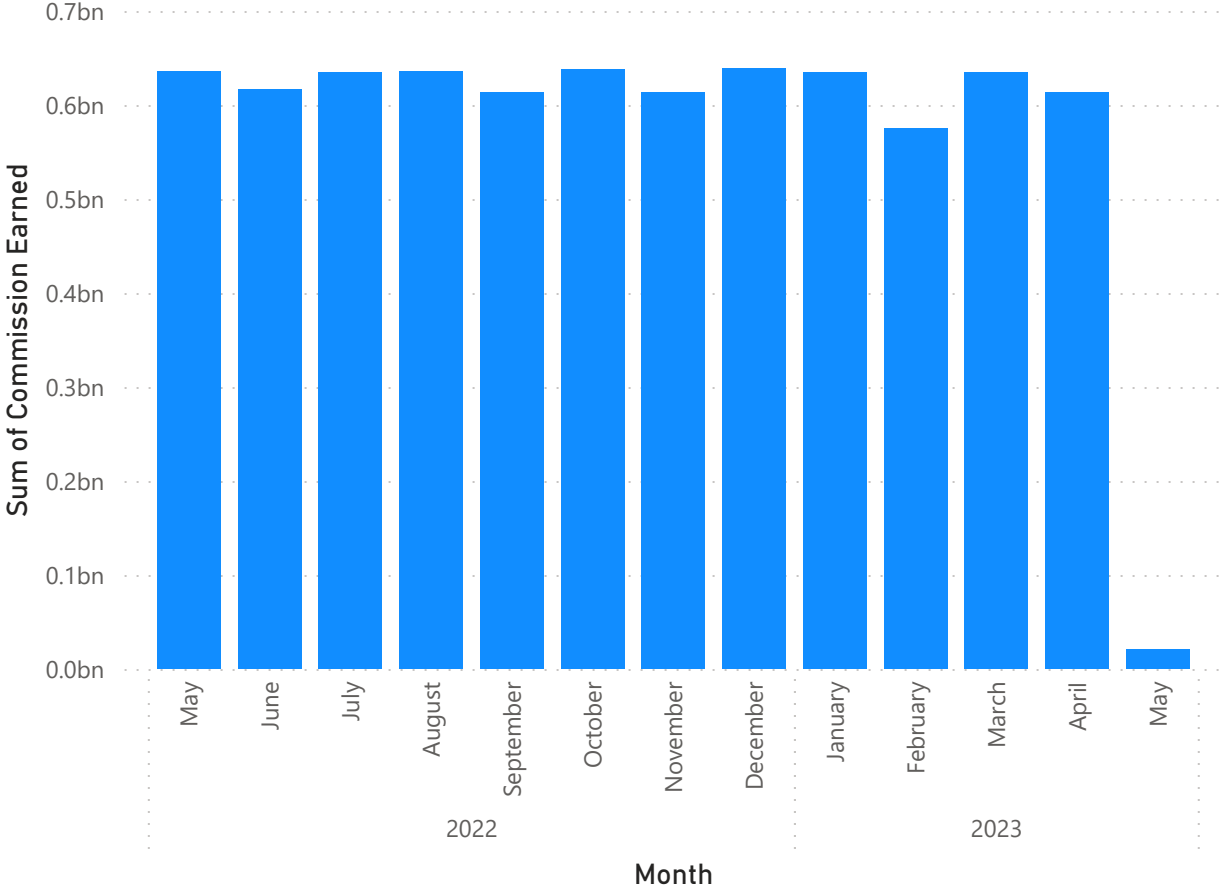

Based on the provided plot, it can be observed that December 2022 had the highest commission earned, while May 2023 had the least commission earned. The trend suggests a peak in commission earnings towards the end of 2022 and a trough around May 2023.

Sum of Sale Price by Year and Month

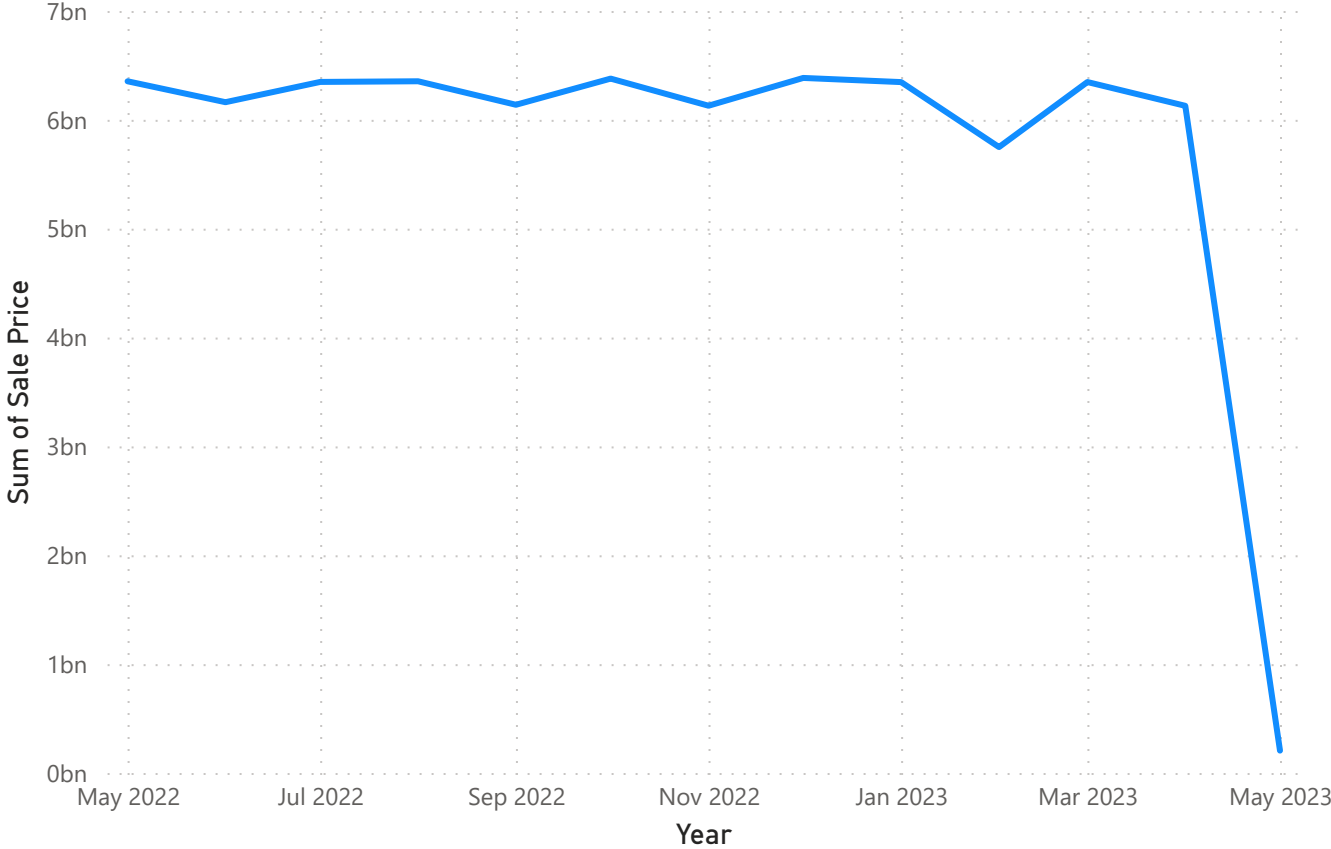

Based on the provided plot, it is evident that December 2022 recorded the highest sale prices, while May 2023 witnessed the lowest sale prices. This observation suggests a peak in sales values towards the end of 2022 and a decline around May 2023.

Sum of Commission Earned by Year and Month

Upon analyzing the data, it is noteworthy that the year 2023 exhibits a lower total commission earned compared to the year 2022. This suggests a potential decrease in overall commission earnings from 2022 to 2023.

Sum of Sale Price by Year and Month

Upon close examination of the data, it is evident that the year 2023 not only experienced a decrease in total commission earned compared to 2022 but also coincides with a declining trend in sales. Specifically, starting from March 2023, there is a noticeable decrease in sales values. This combined insight suggests that the lower commission earned in 2023 may be influenced by a decrease in overall sales, highlighting a potential challenge or trend that may warrant further investigation and strategic consideration for future business decisions
